Okay, for starters, let's be honest. When you hear that someone is offering you a sure proof method to "repair your credit in 30 days" you are a little bit skeptical; and you should be. There are countless

swindlers out there looking to make a quick buck of your financial hardships. Luckily, there are few honest people in the world looking to truly help you improve your life financially. If you are like me, in this economy, you need all the help you can get. Mark Clayborne is one such honest person and, thank God, he has written a book, *Hidden Credit Repair Secrets*, towards the express goal of helping you eliminate debt and improve your credit score to remove the immense burden of financial hardship from your life. I recently read this book and I can honestly say that this book delivers on its promises. Whether you are looking for basic information about exactly what determines your credit score or have heard about Clayborne's "12 Step Dispute Plan" and want to try it out for yourself, this book has exactly what you are looking for. For instance, in the first section of this book, Clayborne lays out in a clear and concise manner exactly how the system works. While I have seen the commercials about my "credit score" and honestly thought I had a decent grasp on exactly what that entails, after reading this book, I must admit I was clueless as to exactly how much this affects my day to day life. I also learned how to monitor that score and to look for possible mistakes that could literally ruin my financial future if not addressed. After laying out the basic ins and outs of the credit system itself, Clayborne then shifts his focus to the process of disputes.
