## Customer Reviews

This is clearly written for people who don't read books - which is just as well because most retailers rarely find the time to read the books they would like to. That's why the format in 'Just about everything a retail manager needs to know' is so useful for managers. It is clearly indexed and cross-referenced which allows you to hone in on the topic you want to know about quickly and easily. This might be on how to write signs that sell, how to face products correctly, how to set up a shop window or even something as simple as how to use a PA system effectively in your

store. There are a whole multitude of topics to choose from and the information given is simple, straight forward and therefore easy to apply. It's a wonderful format, tailor-made for the retail industry.
