Possibly the best technical collection I've ever seen: it consists of 3 books, all of which are various exercises from the three titular characters, arranged progressively. I was about halfway through Alfred's Basic Adult All-in-One Piano Course: Level 3 (Alfred's Basic Adult Piano Course), when I began work on a dry technique book, Pischna Technical Studies: 60 Progressive Exercises for the Piano. It's not that there was a problem with the Alfred's, no. It's just that since that Alfred's has so many recognizable songs, you start to have counting and dynamics problems because you keep trying to make the songs sound nice. So I shut myself up for about 10 months working slowly through Pischna. That book is nothing but a bunch of technical scale-type studies, but since they're not recognizable melodies and they're not intended to sound nice, you tend to pay stricter attention to counting and smooth transitions. I wasn't sure how much good this was doing me, but I stuck to it

and when at last I resumed my Alfred's I swept all before me and laughed at their "ambitious section." As proud as I am of my magnificent achievement, I wish that this 3-volume set, edited by Ingrid Jacobson Clarfield, had been around when I did that, as these three volumes are head-slappingly superior. They just didn't exist at the time I did that, having been published around 2005. Shame.
